The Christmas story

When we think of the season of Christmas, we think of the birth of Jesus Christ. But the story of Christmas is much more than just a birth story. It is a story of love, hope, and redemption. The story begins with the birth of Jesus in a manger in Bethlehem. The angels announced his birth to the shepherds, and the wise men followed the star to find him. The story ends with the resurrection of Jesus on the third day after his death. The Christmas story is a story of God's love for the world, and it is a story that gives us hope and joy.

1. The angels announced the birth of Jesus to the shepherds.

2. The wise men followed the star to find Jesus.

3. Jesus was born in a manger in Bethlehem.

4. Jesus was resurrected on the third day after his death.

5. The Christmas story is a story of God's love for the world.

6. The Christmas story gives us hope and joy.

7. The Christmas story is a story of redemption.

8. The Christmas story is a story of love.

9. The Christmas story is a story of hope.

10. The Christmas story is a story of joy.

Star	Wise men	Shepherds	Angels
Jesus	Birth	Death	Resurrection
Star	Wise men	Shepherds	Angels
Jesus	Birth	Death	Resurrection

Unit on the Sun, Earth and Moon

Day 1

1. Rotating means to

a. move in a circular path around another object

b. move up and down

c. spin around and around

d. moving in a straight line

2. Revolving means to

a. move in a circular path around another object

b. move up and down

c. spin around and around

d. moving in a straight line

3. Another name for revolving is

a. rotating

b. orbiting

c. moving in a straight line

d. gyrating

4. The picture on the right shows Earth

a. rotating

b. revolving

c. orbiting

d. stopping

5. The earth rotating on its axis causes

a. seasons b. years c. days and nights d. sun spots

6. How long does it take for the Earth to make one rotation on its axis?

a. one year b. one day c. one month d. one week

7. The drawing below shows

a. The Earth revolving around the Sun.

b. The moon rotating.

c. The Sun rotating.

d. The Sun revolving around the Earth.

8. How long does it take the Earth to orbit the Sun one complete time.

a. one year b. about 365 days c. one day d. both a and b

FLOW CHART

Most of us use a loose form of the scientific method to solve everyday problems. For each of the problems and observations below, develop a hypothesis to explain what's happening. Then describe how you might test your theory with a simple experiment.

 PROBLEM ▶	 OBSERVATION ▶	 HYPOTHESIS ▶	 EXPERIMENT
Your cat rejects a can of tuna cat food.	She ate the can of chicken flavored food you fed her last night, and the beef food from the night before.		
Your bedroom air conditioner blows very cold air at night, but only cool air during the day.	Your bedroom gets lots of direct sunlight all day long.		
You're talking on your cell phone in your bedroom, when suddenly the reception goes bad for a minute.	Just before the reception clears up, you hear the microwave beep in the kitchen.

PHASES OF THE MOON

1. How long does it take the Moon to orbit Earth?

2. What shape is the orbit?

3. What is the Moon's closest point to the Earth called?

4. What is the Moon's farthest point from the Earth called?

5. Why do we always see the same side of the Moon?

6. The Moon revolves around the Earth in what direction?

7. Draw in the Moon in each of the following phases correctly. Label each phase.

Materials change when they are cooled. For example, water (a liquid) changes into ice (a solid). This change is called *freezing*. Food becomes very hard when it is placed in the freezer because the water in the food freezes. Water vapor (a gas) turns into liquid water when it cools. This is the steam you see coming out of a boiling pot of water. Windows may look foggy in the winter time because of water vapor condensing on the cold window. Condensing materials are changing from a gas to a liquid.

Look at the picture below. Can you spot five examples of materials that have changed as they cooled? Draw a circle around each one.

① **Take extra care** - ask an adult to supervise you.
Design and conduct an experiment to see whether hot or cold water freezes faster. Repeat this experiment and see whether salt or plain water freezes first. Don't forget to make your hypothesis first.
